Samana Hassan

12560 Mill Run Drive Frisco, TX 75035
| (317) 795-9929 | samana7860@gmail.com

Seeking a Summer 2027 internship to apply my electrical engineering and programming skills while gaining hands-on industry experience.

Education

University | University of Texas at Dallas - Richardson, TX

- Expected Graduation: 2029
- Degree: Electrical Engineering
- GPA: 3.90/4.0
- Relevant CourseWork: Introduction to Programming, Introduction to Digital Systems, Digital Circuits, Probability Theory & Statistics.

Skills

Programming Languages: Python, C, Verilog, HTML, CSS, Javascript
Engineering Software: MATLAB, KiCad, SOLIDWORKS, Onshape, XFLR5
Development Tools: Git/GitHub, Visual Studio Code, MSYS2/MinGW, Quartus Prime, ModelSim
Hardware: Soldering, Wiring, ESC Telemetry
Team Skills: Technical Communication, Team Collaboration, Problem-Solving, Adaptability

Experience

Nextech Catapult Internship Program | Indianapolis, IN
Technology Intern | Jun 2024–Jul 2024

- Developed websites in VS Code using HTML, CSS and JavaScript.
- Engaged with technical professionals in data analytics and cyber security to learn more about how these technologies can be applied within the industry.

The Scoop | Zionsville, IN
Supervisor and Shift Leader | Mar 2021–May 2025

- Managed daily operations, including opening/closing procedures, cash register reconciliation, inventory oversight.
- Developed strong leadership and multitasking skills while balancing work with academic commitments.

Projects

Comet Aviation — UTD AIAA | Richardson, TX
Aircraft Design Competition (ADC) Team Member | Sep 2025–May 2026

- Collaborated on a three-person team to design and manufacture an RC aircraft that achieved **44 mph**, using **SOLIDWORKS** and **XFLR5** to support design decisions.
- Evaluated wing-design tradeoffs and helped implement a rectangular wing that simplified manufacturing.
- Contributed to a preliminary design report documenting project goals and the team's engineering approach.

Design/Build/Fly (DBF) Electronics Team Member | Sep 2026–Present

- Collaborates with a seven-person team to evaluate motor-propeller configurations using **MATLAB** and support component selection.
- Uses live ESC telemetry to evaluate motor performance, with **GitHub** supporting code version control and team collaboration.
- Supports aircraft electrical integration through wiring, soldering, and motor-propeller testing.

Comet Robotics — UT Dallas | Richardson, TX
PLANTS Combat Robotics Team Member | Sep 2026–Present

- Designs and builds a custom one-pound combat robot, balancing component placement and manufacturing constraints within the competition's weight limit.
- Applies Onshape, 3D printing, and electronics skills to turn the robot design into components for assembly.
